Boeing Awards Components Manufacturing Contract to Germany-based COTESA

- *COTESA will produce complex composite parts for the Boeing Chinook H-47 heavy-lift helicopter*
- *COTESA joins Boeing's supply chain of nearly 100 suppliers in Germany*

BERLIN, June 1, 2017 – Boeing [NYSE: BA] has awarded Saxony-based COTESA GmbH a five-year contract to manufacture key components for the H-47 Chinook heavy-lift helicopter. This is the first Boeing contract award to COTESA.

“We are committed to bringing opportunities to German companies from across the Boeing enterprise and will continue to strive to bring the best of Boeing to industry and the best of industry back into Boeing,” said Michael Hostetter, Defense, Space & Security director of Vertical Lift Programs, Germany. “As a leading production facility for specialty composite parts, COTESA’s expertise will support our efforts to enhance the Chinook helicopter and deliver top-quality, cost effective solutions to our customers.”

With this agreement COTESA is joining Boeing’s already established supply chain in Germany, in addition to its global supply chain of more than 20,000 suppliers and partners around the globe. “The contract award to COTESA is a testament to the technology potential we see in Germany and another important milestone in our partnership with German industry,” said Sir Michael Arthur, president, Boeing Europe.

“We are excited to join the Boeing supplier team. This contract award provides an opportunity for COTESA and our employees in Mittweida to demonstrate our expertise in high performance composite parts,” said Jörg Hüsken, chief executive officer of COTESA.

COTESA will manufacture portions of the Chinook tunnel cover section – a honeycomb-like core that makes up parts of the helicopter’s external skin -- for the global Chinook fleet.

“The Chinook is an industry-leading platform and a critical platform for the armed forces of 19 countries around the world,” continued Hostetter. “Its proven ability to meet mission requirements, including humanitarian and disaster-relief operations, makes it even more important for us to continuously bring the best of industry to the platform – and that’s the case with COTESA.”

To date, Boeing has delivered more than 900 H-47 Chinook helicopters that are in operation in 19 countries, including eight NATO nations; Canada, Greece, Italy, Netherlands, Spain, Turkey, United Kingdom, and the U.S., allowing for increased interoperability between NATO nations during joint training and deployment operations worldwide.

About Boeing in Germany:

Boeing has been an active partner in the German aerospace industry for decades. With 600 local employees in Germany, Boeing supports an additional 12,000 jobs through its suppliers and partners. In 2016, Boeing and its supply chain partners spent almost US\$1.3 billion with nearly 100 suppliers located across Germany. Boeing invests in a growing portfolio of research and technology projects with German industry, universities and research organizations, and engages in industrial partnerships with companies of all sizes across Germany that benefit the local economy.

About COTESA:

COTESA is a leading supplier of high-quality composite components for aerospace and automotive qualified according to EN 9100 and NADCAP Composite. The company develops and manufactures customer-specific solutions for parts and assemblies at two sites with more than 600 employees. COTESA’s focus is on complex CFRP-components as profiles, stiffeners and frames, multidimensional GFRP-sandwich structures, hybrid parts as CFRP-transmission shafts as well as the assembly of complete modules.

From technology to process development, COTESA offers the highest quality in prototype as well as serial manufacturing. Being involved in multiple long-term

aerospace-programs sets the basis for the continuous company growth since the founding in 2002.
